

How to send your images and electronic artwork to DigiGifts without a glitch

We are pleased to accept files from all major Windows and Mac OS applications. All hard-copy forms of media will be sent back to you (if required).

We accept files from the following applications:

- Adobe Acrobat
- Adobe Illustrator
- Adobe Photoshop
- CorelDRAW
- Paint Shop Pro
- Macromedia Freehand

File Size Recommendation:

Please be sure to send us the highest possible quality and size version of your images so that we can guarantee the best possible result. Usually photos which are over 1MB in file size are preferred as anything lower is not suitable for printing on larger products. If however your getting something smaller printed (ie: keyring, ornament, etc), a smaller version may be acceptable.

If any scanning, typesetting or alternation is involved it must be clearly detailed. We support various transfer methods:

- www.YouSendIt.com File Sending
- Zip (compressed) File
- E-mail
- CD-Rom / DVD-Rom
- Memory stick/card, USB Drive

Please print this form, complete and include along with any hard-copy material:

Contact Name: _____

Company: _____

Telephone No: _____

Postal Address: _____

Email Address: _____

Order Number: _____ (if known)

File source:

- Floppy Disk
- CD-Rom
- DVD-Rom
- USB Drive
- Memory stick/card
- Printed Photographs

Please label all material with a return address!

Things To Keep In Mind:

- Please remember to supply us with all relevant files for output (eg: fonts and graphics) where necessary, otherwise this may delay your order.
- Please provide any details for how you may wish for your images to be cropped or modified. Extensive adjustments may incur additional fees.
- If delivery is urgent please check that your deadline is achievable with our delivery timeframes. You may wish to consider sending your images via express or registered post for tracking and to avoid it getting lost in transit.

Application Used (for electronic files):

- Adobe Acrobat
- Adobe Photoshop
- Adobe Illustrator
- CorelDRAW
- Paint Shop Pro
- Macromedia Freehand
